

TYR

FULLY BALANCED INTEGRATED AMPLIFIER

The little giant. Little refers to price. Giant refers to quality. Because while the Tyr is the least expensive component Bladelius makes - it's still assembled with all the same precision craftsmanship and meticulous construction as the costlier units. It's not quite as powerful nor does it have as many features. So what we're really

saying is you are not paying extra for extras. It has one processor input, for using the Tyr in a surround system and because of its unique power capabilities it can control and drive almost any demanding speaker on the market.

Specifications	TYR
Output:	2 x 100W 8Ω
Distortion:	< 0.01% 20-20KHz
Bandwidth:	dc-150KHz
Input impedance:	20KΩ
Toroidal transformer:	1,2KVA
Inputs:	1 balanced 3 unbalanced 1 tape in
Outputs:	1 tape out 1 preamp output
Speaker terminals:	WBT
Weight:	18 kg
Dimensions:	100x440x445 mm (HxWxD)
